## **CSWC Operational Period Summary**

**0600 November 22 2017 to 1800 November 22 2017**

Dear California Office of Emergency Services,  
Thank you for helping out with the fires that  
took many families' homes and some loved ones.  
We are able to go back to our homes  
thanks to all the fire fighters.

Thank you again for the support to  
end the monstrous fires. Thanks.

From,

Briana

8th grade student  
of HJH

Briana, an 8<sup>th</sup> grader from Healdsburg Junior High School sent a card to personally thank us for the Agency's help during the October Fire Storm.

# **WEATHER OF CONCERN**

## **Weather of Concern**

- Periods of rain will impact northwest California through Thanksgiving week with falling snow levels late in the weekend. Rain or mountain snow may impact your holiday travel. Check the weather forecast and road conditions before heading out.
- Record breaking temperatures expected in Southern California today and Thanksgiving as a strong ridge of high pressure builds over the region. Highs today will likely be 15 to 25 degrees above seasonal normals for most areas.

## **Active Weather Warnings, Watches and Advisories by County:**

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

The region is under a SW flow aloft, sandwiched between high pressure over southern CA and the Desert SW and the storm track over the Pacific NW. This pattern will continue through Saturday. The NW portion of the North Ops region will be mostly cloudy with occasional showers and gusty S-SW winds, with more showers and stronger winds over the higher terrain. Valleys in the east and south will be mostly clear to partly cloudy with only slight chances of light rain showers on Thanksgiving Day and Saturday. The pattern will shift east and a colder weather system will move over the North Ops region Sunday through early Monday. Snow levels will drop to 3000 ft in the north and 5000 ft in the south. Dry and warmer weather with occasional northerly winds will prevail much of the rest of next week.

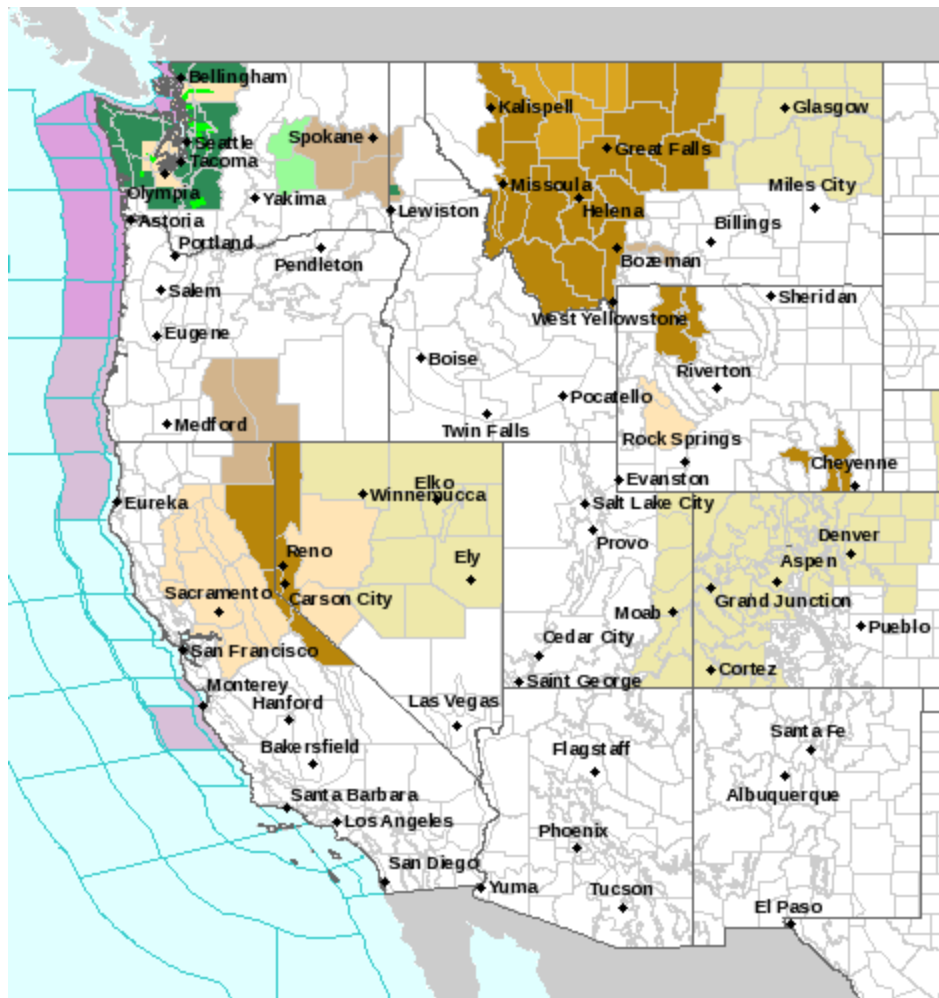

## **SOUTHERN CALIFORNIA**

\*\*\*Local gusty northeast to east winds across Southern California today\*\*\*

\*\*\*Record heat and very dry through Thursday\*\*\*

Weak surface high pressure over Colorado will bring northeast to east winds of 10 to 20 mph with gusts to 35 mph to the mountains and below the canyons and Passes of Southern California through this afternoon. Strong high pressure aloft centered off the Northern Baja Coast will bring record heat and low humidity to the region through Thursday. Maximum temperatures will be in the upper 60s and 70s across the mountains, mid 70s to mid 80s in the Central California Valleys, and upper 80s to mid 90s in the Southern California Valleys. Minimum humidity will be mainly in the upper single digits and teens. The high pressure area will weaken and move east bringing a little cooler temperatures to the region Friday and Saturday. There will be little change in minimum humidity Friday and Saturday. A Pacific trough will move inland across the West Coast bringing significant cooling Sunday and Monday. Scattered showers will be possible across Central California Sunday afternoon through Monday afternoon with light rainfall accumulations. This trough will also bring strong westerly winds to the mountains and deserts as well as the Central Coast. Another ridge will build into California behind the trough bringing warm and dry conditions to the area Tuesday and Wednesday. Strong northerly winds will be possible over Santa Barbara County and the Grapevine Monday night, with possible strong northeast to east winds over Southern California next Tuesday and Wednesday.
